

OPTi-LOGIC

Golf

Rangefinders were once considered only a training aid for the serious golfer. With the changes to the rules of Golf to allow for their use they are now an essential tool. To meet the needs of both the amateur and the Pro, Opti-Logic have released a series of rangefinders aimed specifically at the golfer.

Utilising technology developed for use in surveying and forestry, Opti-Logic have taken proven features and built on them to produce the 1500GL and 1500GT rangefinders. Both have the same targeting system, with a near infrared laser beam used to measure the distance and a red dot in the view finder to let you pinpoint what you are aiming at.

For tournament use and posting of handicap scores the 1500GL is the ideal tool. Able to measure up to 1372 metres to a reflector the GL has the accuracy and ranging ability for most applications. For the golfer looking for a training aid there is the 1500GT, which will not only measure line of sight distance, but also true horizontal (slope) distance.

Ballinger Technology, the Australian distributor of Opti-Logic rangefinders, is seeking dealers for these instruments and others in our range.

1500 series specifications.

Resolution: 0.1 of a metre	Accuracy: +/- 1 metre (typical)
Min range: 4 metres	Max range: 1372 metres
Sighting: Internal LED	Dimensions: 10 X 12.7 X 4.5 cm
Weight: 340 gm	Power source: 9V battery
